(2) Performance - Global

- Sales and OP improvements, favorable effect from raw material price

Despite the weak global tire demand, total sales was increased by additional volume from new plants and favorable currency.

Raw material cost was lower than 1Q, but high SG&A led to OP margin decrease.

※ ~Aug. 2012 : HKT before spin-off / Sep.2012 ~ Dec. 2012 HKT after spin-off, HKTWW not included

(2) Performance - Korea

- Low raw material cost but high SG&A led to OMP ↓

RE Sales increased due to the strengthened marketing activities.

But OE sales declined because new car production slowdown in Korea.

Differ from other major market, ASP in Korea was maintained.

※ ~Aug. 2012 : HKT before spin-off / Sep.2012 ~ Dec. 2012 HKT after spin-off, HKTWW not included

EUR/KRW	1,479	1,418	1,414	1,431	1,465

(2) Performance - China

- Maintaining high margins due to low raw material costs

China's domestic tire demand in 2nd half is expected to rebound slightly.

Also the completion of 1st step of TBR in Chongqing plant led to sales volume increase and downtrend raw material price was favorable to OP.

(2) Performance - Hungary

- Despite the weak demand, sales↑ and OPM stabilized

Although slow demand in EU, improvement in our product mix was stunning.

Total sales volume was increased, but due to the market situation, our ASP declined.

Sales was flat, year on year.

※ ~Aug. 2012 : HKT before spin-off / Sep.2012 ~ Dec. 2012 HKT after spin-off, HKTWW not included

(2) Performance - Indonesia

- Low raw material price led OP turn around

New plant in Indonesia showed operating margin turn around due to the low raw material price. Capacity from INA is mainly exporting to N. America, the tire market demand in N. America will affect INA plant's sales growth.
